

Identification of the area

Name or Designation: **Area 40:** Central District; Rainier Valley; South First Hill (Madrona and Leschi), Beacon Hill; Mount Baker.

Boundaries: Area 40 boundaries are East Spruce Street to the North; Lake Washington to the East; South Graham Street to the South; Interstate 5 to the West.

Maps: A general map of the area is included in this report. More detailed Assessor's maps are located on the 7th floor of the King County Administration Building.

Area Description:

The northern portion of area 40 contains neighborhood 10 (Central District, Eastern portion of the International District), neighborhood 20 (Central District) and neighborhood 30 (Leschi, Judkins Park).

The Urban Village developments are within the location of 23rd and Jackson, 23rd and Union, and along the major arterial streets of 12th Avenue, 14th Avenue, Boren, Yesler Way, South Jackson Street, Rainier Avenue South, Martin Luther King Junior Way South, and South Dearborn Street. This area is heavily urbanized consisting of retail stores, small offices, churches, daycare, small private schools, franchise fast-food restaurants, multi-family apartments and condominiums. It is progressively transforming from an older declining area to a rehabilitated area, steadily changing in moderate pace, as financing becomes more readily available to property owners.

The Central District has strong neighborhood based action groups and in cooperation with the City of Seattle they are in the process of revitalizing the community. Community development corporations are implementing development in accordance with their plans by private market activity in both housing and the commercial sector. The challenges ahead will include the ability to successfully implement urban village type development, job creation, and housing to capture a greater market share of residents' retail consumer spending. Revitalization and redevelopment strategies have been aiding in the reorganization of investment in community assets to increase local business development, employment opportunities and livability within the community.

Fairfield Residential purchased the former Wonder Bread Bakery site from Lowe Enterprises Northwest and Washington Holdings. The site in the heart of the Central District on South Jackson Street between 18th and 19th Avenue South will, according to published reports, include approximately 250 apartments and roughly 6,500 square feet of retail space.

The Pratt Fine Arts Center purchased a full block from Lowe's where it will build a new art center more than twice its current size. Their plan is to build the Northwest's largest center for working studio artists funded by a \$2.1 million challenge grant from the Jon and Mary Shirley Foundation.

Also, conceptual plans are taking place to develop the Seattle Goodwill site on South Dearborn as a mixed-use project. Ravenhurst Development and TRF Pacific plan to develop a multi-level project with up to 600,000 square feet of retail, an estimated 450 residences, in addition to approximately 120,000 square feet for Goodwill. The project will still need vacation of some city streets, acquisition of further land, and permit approval from the city to be completed as planned.

Developer interests, private investment, and its proximity to Downtown Seattle and the city's business, retail, and industrial cores suggest the Jackson Street corridor and surrounding areas to be evolving.

The southern portion of area 40 contains neighborhoods 40 (Beacon Hill), 50 (Mount Baker, Rainier Valley), 60 (Rainier Valley, Columbia City) and 70 (Rainier Beach).

Major business arterials in this area are Rainier Avenue South, North Beacon Avenue and Martin Luther King Junior Way S. The commercial buildings located along Rainier Avenue South and Martin Luther King Junior Way S; primarily consist of retail, small offices, daycare, restaurants, franchise fast food, multi-family and apartments. The majority of Industrial zoned land is in the southwestern section near the southern city limits between Interstate 5 and Martin Luther King Junior Way S. The Jefferson Park Golf Course is located west of Martin Luther King Junior Way S. Lake Washington Boulevard is predominately residential with the recreational areas of Colman Park, Seward Park and Mount Baker Park located on the Lake Washington shores. The Puget Sound Veterans Administration Hospital is located off of Beacon Avenue South.

Commercial and industrial activities are predominately in the Valley neighborhoods including Rainier Avenue, Genesee Street, Martin Luther King Junior Way S., Graham Street and Columbia City. All have undeveloped or underdeveloped land and offer potential for development. This area is slowly and progressively revitalizing its neighborhoods after a long period of decline. Construction of the new 10,000 square foot King County Branch Library on Beacon Hill and expansion of the Rainier Beach Branch Library have recently been completed.

Construction is well under way on the new 14 mile Sound Transit Central Link light rail line that is a significant piece in the regions transportation future, due for completion in early 2009. The light rail will reconnect the city to the Rainier Valley community and in the process transform Martin Luther King Junior Way S. into an urban boulevard. Construction impacts will be felt mostly in Rainier Valley. Five light rail stations are planned for Rainier Valley. These stations are being built along Martin Luther King Junior Way S. A station at Edmonds Street will be next to the Seattle Housing Authority's, Rainier Vista Housing complex, providing opportunities to enhance the commercial and pedestrian-friendly character of the Columbia City neighborhood.

A station at Henderson will accommodate the pedestrian walkway to Rainier Beach and will encourage additional market rate multi-family housing. The McClellan station will offer an opportunity to create a mixed-use neighborhood center and increase the retail and multi-family housing supply. Planners are focused on condensing activity within walking distance of major transit stops, thus reducing vehicle traffic. Apartments mixed with single-family housing, restaurants, dry cleaners, grocery stores and bank branches will be within a few blocks of each other. Such high-density living is intended to provide a built-in base of transit users. A moratorium has been in effect to prevent the construction of new, or the expansion of existing, auto-oriented uses until station area planning is done.

The Beacon Hill station is being constructed as well as an elevator and a twin bore tunnel being excavated under Beacon Hill. The tunnel will allow access north to King Street station and south down the length of Rainier Valley. This station will offer an opportunity to create a mixed use neighborhood center in the Beacon Hill retail area.

City of Seattle Department of Design Construction and Land Use is in the planning stages of changing Single Family 5000 (SF 5000) zoning, at strategic locations on North Beacon Hill, to Neighborhood Commercial/Residential 40 (NC2/R40) zoning. This would be to encourage additional mixed-use commercial and residential development within North Beacon Hill's retail core

The Rainier Court Associates low income project dominates the lower Rainier Avenue area near Estelle Street. This mixed use seven story project contributes to the urban village concept anchored by Safeway, Hollywood Video and other existing strip retail. Other low income projects include Gamelin House, Othello Station, New Holly and Rainier Vista which are being constructed on Martin Luther King Jr. Way.

SouthEast Effective Development or SEED, a community nonprofit group, celebrated its 30 year anniversary. Also, SEED won the national Phoenix Award for redeveloping a brownfield at Rainer Court. SEED has played a significant role in the revitalization of Southeast Seattle by helping secure millions of dollars in public improvements and in affordable housing since their inception. Their efforts along with the Rainer Valley Community Development fund, the Rainer Valley Chamber of Commerce, community based organizations, and government and private investment are undeniably transforming the community throughout area 40.

Physical Inspection Identification:

Neighborhood 40-40 (Beacon Hill) was physically inspected for the 2006 assessment year.

Scope of Data

Land Value Data:

There were 34 vacant land sales considered in Area 40 with sales dates from 3/5/2003 to 8/26/2005. Thirteen of these sales were 2005 sales. Sales information is obtained from excise tax affidavits and reviewed initially by the Accounting Division Sale Identification Section. Sales information is analyzed and investigated by the appraiser to determine if they are market transactions. Sales in Area 25 to the north were considered as well as residential sales on commercially zoned land. These sales were given primary consideration for valuing land as of 1/1/2006.

Sales Analysis by Neighborhood

Area 40-10: Central District, Eastern portion of the International District

Neighborhood 10 boundaries are E. Spruce St. to the North, 23rd Avenue South to the east, Interstate 90 to the South and Interstate 5 to the West.

All land sales in this area were analyzed and eight were considered market sales. Land values in this neighborhood changed to reflect the indicated market trend. The table below represents the 2006 estimated land values and shows the price per square foot of market sales in each zone.

AREA NEIGHBORHOOD	ZONING	2006 \$ PER SF VALUE	SALES \$ PER SF
40-10	C1-65	\$12-60	
40-10	C2-40	\$25	
40-10	C2-65	\$24-50	\$20.20
40-10	IC-65	\$20-60	\$65.10
40-10	L-1	\$17-20	
40-10	L-2	\$20-25	
40-10	L-2/RC	\$30	
40-10	L-3	\$13-60	\$44.27, \$45.57, \$54.17, \$56.82, & \$66.67

Area 40-20: Central District

Neighborhood 20 boundaries are E. Spruce Street to the north, 31st Avenue South to the East, Interstate 90 to the south, and 24th Avenue South to the west.

All land sales in this area were analyzed and three were considered being market sales.

Land values in this neighborhood changed to reflect the indicated market trend. The table below represents the 2006 estimated land values and the price per square foot of market sales in each zone.

AREA NEIGHBORHOOD	ZONING	2006 \$ PER SF VALUE	SALES \$ PER SF
40-20	C1-40	\$37	
40-20	C1-65	\$37	
40-20	L-1	\$9-30	
40-20	L-2	\$6-27	\$20.46
40-20	L-2/RC	\$10-20	
40-20	L-3	\$30-45	
40-20	L-4	\$35-48	
40-20	LDT	\$16-25	\$31.01 & \$60.61

40-20	NC3-65	\$30-37	
40-20	SF-5000	\$11-32	

Areas 40-30: Leschi, Judkins Park

The boundaries for neighborhood 30 are E. Spruce Street to the North, Lake Washington to the East, Interstate 90 to the South and 31st Avenue South to the West.

There was no market evidence to indicate a change in the land values in Area 40-30

Land values in this neighborhood did not see a significant change. The table below represents the 2006 estimated land values.

AREA NEIGHBORHOOD	ZONING	2006 \$ PER SF VALUE	SALES \$ PER SF
40-30	NC1-30	\$18-25	
40-30	NC1-40	\$20-82

Area 40-70: Southeast Lake Washington neighborhood

Neighborhood 70 boundaries are Lake Washington to the North and East, Graham Street to the South, 43rd Avenue South, 47th Avenue and 48th Avenue South to the West.

There was no market evidence to indicate a change in the land values in Area 40-70. Land values in this neighborhood did not see significant change. The table below represents the 2006 estimated land values.

AREA NEIGHBORHOOD	ZONING	2006 \$ PER SF VALUE	SALES \$ PER SF
40-70	NC1-30	\$20-22	
40-70	SF-5000/7200/9600	\$3-12	

Land Value Conclusions, Recommendations and Validation:

Land values were estimated based on the Sales Comparison approach. Sales were analyzed based on zoning, size, location and development potential. Changes were made based on recent land sales and to achieve equalization in neighborhoods in accordance with zoning, size and location. In the absence of sales in a neighborhood, sales in other similar neighborhoods were considered. Appraiser judgment prevails in all decisions regarding individual parcel valuation. The appraiser determines which available value estimate may be appropriate and may adjust for particular characteristics and conditions as they occur in the valuation area.

The total land assessed value for the 2005 assessment year for area 40 was \$526,906,858 and the total land assessment value for the recommended 2006 assessment year is \$653,374,900. Application of these recommended values for the 2006 assessment year results in a change from the 2005 assessments of plus 19.35%.

A list of vacant sales used and those considered not reflective of the market value are included in the following sections.

Improved Parcel Total Values:

Sales comparison approach model description:

There are 40 improved sales in area 40 that were considered fair market transactions. 34 of these sales were included in the ratio study, while the remainder 6 sales were excluded due to characteristic changes after the sale. The sale dates range from 03/06/2003 to 12/20/2005. All sales were verified with a knowledgeable party when possible. Each sale was inspected and the recorded property characteristics adjusted when necessary. The resulting data was stratified according to predominant use, location, age and size in order to establish appropriate ranges of price per square foot of net rentable area to use as guidelines.

Regression

Regression was not used in the revalue of the commercial properties in this area. See report on apartments and condominiums for use of regression models.

Cost approach model description

In those areas where a cost approach was done the Marshall & Swift Commercial Estimator was used. Depreciation was also based on studies done by Marshall & Swift Valuation Service. The cost was adjusted to the western region and the Seattle area. Cost estimates were relied upon in almost every instance of exempt properties including schools, churches, public buildings and government buildings. Cost estimates also served as value indicators for new construction projects.

Cost calibration

The Marshall & Swift Valuation modeling system, which is built in the Real Property Application, is calibrated to the region and the Seattle area.

Income capitalization approach model description

The Income Approach was considered the most reliable approach to valuation in Area 40. Income parameters were derived from the market place through sales and listed for sale information, as well as through market surveys and available publications. Stratification of these parameters of the various property types indicates:

Area 40-10:

PROPERTY TYPE	RENT/SF	VACANCY	EXPENSE	OAR
Retail, Restaurant, Convenience Store, Daycare Center	\$9.00 to \$22.00	5%	20%	6.5% to 8.5%

Apartment, Multiple Residence Low Rise,	\$5.00 to \$13.00	5%	20% to 25%	7.00% to 8.50%

Income approach calibration

The models were calibrated after setting base rents by using adjustments based on size, effective age, condition, quality and class of construction, as well as location.

Reconciliation and or validation study of calibrated value models including ratio study of hold out samples.

All parcels were individually reviewed by the area appraiser for correctness of the model application before a final value was selected. All of the factors used to establish value by the model were subject to adjustment. The market rents as established by the income model were used as a guide in establishing the market rental rates used. The market rental rates applied vary somewhat but fall within an acceptable range of variation from the established guideline. The Senior Appraiser reviewed final value selects before posting.

Model Validation**Total Value Conclusions, Recommendations and Validation:**

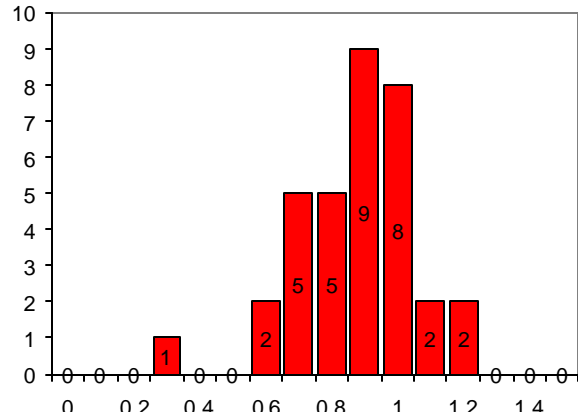

Appraiser judgment prevails in all decisions regarding individual parcel valuation. Each parcel in the physical inspection area was field reviewed and a value selected based on general and specific data pertaining to the parcel, the neighborhood, and the market. The Appraiser determines which available value estimate may be appropriate and may adjust for particular characteristics and conditions as they occur in the valuation area.

The standard statistical measures of valuation performance are presented in the Executive Summary and the 2005 and 2006 Ratio Analysis charts included in this report. Comparison of the 2005 and 2006 Ratio Study Analysis indicates that the weighted mean statistical measure of assessment level went from 80.4% to 97.4%. The Coefficient of Dispersion (COD) went from 17.13% to 14.36%, the Coefficient of Variation (COV) went from 22.69% to 21.44%, and the Price-related Differential (PRD) went from 1.03 to 1.02. Although the ratio study may look a bit aggressive, the market is in a rising mode and the ratios for older sales are skewed towards values over 1 because the market has eclipsed the older sales.

The total assessed value in area 40, for the 2005 assessment year, was \$1,130,038,558 and the total recommended assessed value for the 2006 assessment year is \$1,289,841,881. Application of these recommended values for the 2006 assessment year results in an average total change from the 2005 assessments of + 12.39%.

Note: More details and information regarding aspects of the valuations and the report are retained in the working files and folios kept in the appropriate district office.
